EDUCATION

Indian Institute of Information Technology, Kottayam (IIIT Kottayam)

2023 – 2027

B.Tech in Computer Science and Engineering, Specialization in AI & Data Science

CGPA: 8.92/10

EXPERIENCE

AI Intern

Feb 2026 – Present

Klyonix Tech Consulting

- Designed a multi-tenant chatbot using **RAG + Text-to-SQL architecture** for querying relational databases and real-time insights
- Built dynamic SQL generation pipeline to extract key metrics, reducing reporting effort by **60%**, and improving temporal query accuracy
- Implemented **role-based access control (RBAC)** at the LLM layer to enforce secure, hierarchy-based data access while ensuring high accuracy in natural language to SQL translation

AI & Computer Vision Intern

May 2025 – Aug 2025

AI4SEES

- Engineered an end-to-end computer vision system using **YOLOv8** for real-time object detection, segmentation, and hazard tracking, and fine-tuned a theft detection model on edge-case datasets
- Optimized the inference pipeline for high-FPS video streams and integrated ML outputs with a responsive **React.js** dashboard for real-time monitoring

PROJECTS

SpiceNest – Full-Stack E-Commerce Platform | [Demo](#) | [GitHub](#)

May 2026

React.js, Node.js, Express.js, PostgreSQL, Prisma ORM, Tailwind CSS (v4), Razorpay SDK, JWT

- Architected a responsive full-stack e-commerce platform using **React.js** and **Tailwind CSS (v4)** on the frontend with a **Node.js** and **Express.js** backend, enabling seamless product discovery and catalog browsing
- Designed a secure relational database schema using **Prisma ORM** with **Neon Serverless PostgreSQL**, implementing password hashing with **bcryptjs** and authentication using **JSON Web Tokens (JWT)**
- Integrated the **Razorpay** payment gateway for secure checkout transactions and managed global shopping cart state using the **React Context API** to ensure real-time UI updates and a smooth user experience

Casper – Task-Oriented AI Agent | [Demo](#) | [GitHub](#)

Feb. 2026

Python, LangGraph, AutoGPT, Tool-Calling, FastAPI, React.js

- Built an autonomous AI agent using **LangGraph** with multi-step reasoning and self-reflection loops, implementing tool-calling interfaces for external APIs to enable real-world task execution
- Designed a state management system for long-running workflows to maintain context across interactions and built a **React.js** interface to monitor agent execution

LegalEase – Advanced RAG-based Legal Advisor | [Demo](#) | [GitHub](#)

Oct. 2025

Python, ChromaDB, FlashRank, RAGAS, OpenAI API, Streamlit

- Developed a multi-stage **RAG pipeline** combining dense retrieval with **FlashRank re-ranking** and implemented semantic chunking with **ChromaDB**
- Built an automated evaluation pipeline using **RAGAS**, achieving **92% faithfulness** and **88% answer relevance**, reducing hallucinations in generated responses

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL (PostgreSQL/MySQL), C/C++, Java, HTML/CSS

AI/ML & Computer Vision: PyTorch, Scikit-Learn, OpenCV, NumPy, SciPy, TensorFlow

LLM & Generative AI: LangChain, LangGraph, Text-to-SQL, Vector Databases (ChromaDB)

Web Frameworks: FastAPI, React.js, Vite, Tailwind CSS, Flask, Django, Node.js

Developer Tools: Git, GitHub, Docker, VS Code, n8n

LEADERSHIP & EXTRACURRICULAR

House Captain & Badminton Sub-Lead

Oct. 2025 – Present

Sportec - IIITK

IIIT Kottayam

- Led a contingent of **500+ students** as House Captain, coordinating **15+ events** and securing Runner-Up in the intra-college sports meet
- Represented IIIT Kottayam in national-level **Inter-IIIT** badminton tournaments, demonstrating strong competitive performance, teamwork, and leadership
